Downloading the Oracle VM VirtualBox Software

The first file you'll need to download contains all of the SAS software you will use. The second file you need is run by your browser on your computer for what is called 'virtualization'. This paper illustrates downloading and using the Oracle VM VirtualBox, but you may choose to use instead virtualization via VMware Player. There is separate SAS software for each, they must match.

By adhering to the following download and configuration steps, anyone can begin using SAS University Edition software.

1. Download the SAS University Edition software
2. Set the options and run for the first time.

Downloading SAS University Edition Software

In this paper, you'll learn how to download Oracle VM VirtualBox software and SAS University Edition to a Windows environment. For more information about the Mac OS X and Linux environments, consult the specific instructions on the sas.com/universityedition website.

Step 1: Verify that you have a compatible virtualization software package.

Because SAS University Edition is a virtual application (or vApp), you need virtualization software to run it. Compatible virtualization software packages are listed in the table below. If you don't already have compatible virtualization software, you can download a package using the links below.

Windows	VMware Player 6.0 or later	Oracle VM VirtualBox
OS X	VMware Fusion for OS X 6.0	Oracle VM VirtualBox
Linux	VMware Player for Linux 6.0 or later	Oracle VM VirtualBox

Figure 13. SAS University Edition Installation Guide for Windows

We found it useful to either print the configuration instructions or have the PDF open to read.

To configure VirtualBox to work with SAS University Edition:

- 1) On your local computer (in a location that you will remember), create a folder called SASUniversityEdition and a subfolder called myfolders. You will save all of your .ova files to this location.
- 2) Launch VirtualBox.
- 3) Select File > Import Appliance.
- 4) In the Import virtual appliance window, click the folder icon to the right of the field. A file browser window appears.
- 5) Select the SAS University Edition .ova file.
- 6) Click Open.
- 7) Click Next.
- 8) (Optional) In the Appliance settings window, edit the CPU and RAM settings.
Note: The SAS University Edition virtual image is configured to use 1GB of RAM and two processors. You can increase the RAM that is assigned to the SAS University Edition virtual image, but you should assign half (50%) or less of the available physical RAM. You cannot increase the number of processors that are assigned to the SAS University Edition virtual image.
- 9) In the Appliance settings window, click Import.
 The imported virtual machine is displayed in the Oracle VM VirtualBox Manager window.
Note: If the message drives in use is displayed, click Ignore.
- 10) Select Machine > Settings.
- 11) In the navigation pane, click Shared Folders.
- 12) In the upper right of the Settings window, click +. The Add Share window appears.
- 13) In the Folder Path field, click the arrow and select Other.
 A file browser window appears.
- 14) Select the myfolders folder that you created, and then click OK. This folder is mapped to the My Folders folder in SAS Studio.
Note: The shared folder name is case sensitive.
Note: You can add network folders that you have access permissions to. Do not include a backslash (\) in the network folder name.
- 15) In the Add Share window, confirm that Read-only is NOT selected.
- 16) In the Add Share window, click Auto-mount. Then click OK.
- 17) (Optional) Create additional shared folders. Additional shared folders are displayed in SAS Studio under Folder Shortcuts.
- 18) In the Settings window, click OK.
