

MWSUG 2024 - HOW 64

An Animated Guide to the Internals of GIT

Russell Lavery, contractor, Bryn Mawr, PA

Abstract

This seminar is going to be an introduction to the internals of GIT. GIT lives on your computer and communicates with GIT-HUB, which lives on the web. For two reasons, this talk will not cover GitHub. First, learning GitHub, to some extent involves learning your company's way of working and this varies a great deal. Secondly, GIT itself is a very complicated topic.

While I do not think using GIT has a positive ROI most situations, i do think it's worth learning, simply because the market wants people to know GIT.

I would like you to use this as a lunch and learn and as marketing for MWSUG.

However, the paper is too large for the conference software and my animated PowerPoint slides cannot be stored in the conference storage area.

Upon request, I will email the paper supporting this talk (many static slides and all the keystrokes you need to reproduce the talk and learn the material on your own).

Additionally, If you promise to:

- 1) do a L&L at your company and
- 2) promote MWSUG as you do the L&L,

I will email you the paper (all the keystrokes you need to reproduce the material in the paper) and all the animated slides.

The slides took over 100 hours to create (though a smarter person would have made faster progress).

With this material, It would be very easy to lead an in-depth lunch and learn and, hopefully, impress your co-workers.
